Subrah,

Just checking to see if there's been any progress on the WebEx revenue sharing agreement.

I got an introduction to GMT-2000 (www.gmt-2000.com.au), an Australian software company that sells a leading Y2K software package, and they have expressed interest both in the premium WebEx services for internal use as well as being a distributor for WebEx in the Australian and Asian Pacific markets. Any literature you can forward on those topics would be very helpful.

Regards,
Erin
